

Fireplaces and freestanding fire pits are the newest trend in outdoor living and a great way to entertain and socialize while enjoying the beautiful Florida weather.

## LIGHT UP YOUR LIFE

### OUTDOOR FIREPLACES ARE A GREAT WAY TO ENJOY EVENINGS

Nothing is more enjoyable than sitting around an outdoor fireplace with a bunch of friends or loved ones basking in the evening Florida breeze while stars flicker above. The

newest trend in outdoor living, fireplaces and pits are a great way to entertain and socialize with company without sitting around a television.

Jason Smith, owner of Outdoor Impressions, says he spends hours in his backyard with friends, relaxing in rocking chairs around a fireplace, and says a freestanding fire pit is the best way to spend time outside on cool evenings.

"Outdoor fireplaces are the best way to extend your outdoor season long into the fall and winter months," says Jason, who specializes in paver driveways and pool decks, water features, outdoor kitchens, landscape design and lighting.

Many experts say that building an outdoor living space can be one of the most

affordable ways to increase the comfort of your home. But tackling even the smallest job on your own can be a frustrating challenge.

Jason has a solution: Instead of overwhelming yourself, visit Outdoor Impressions' new showroom and let his team of experts turn your dreams into reality. The staff at Outdoor Impressions ensures that every aspect of your project is taken care of so you don't have to deal with several contractors.

"We'll show you ways to expand your outdoor living experience, and we'll do it differently, in style," he says.
